Technical Projects

Event Notifier   Dec'19-Jan'20
- The purpose of this project is to build an Android application which will help the participants of an event to get notified about the event in which they had participated. For database and push notifications, I used Firebase technology.
- User will get notifications in their mobile application about all the updates about the event from the admin of the event.

Online Teaching Whiteboard(Major Project)   April'20-Jan'21
- In this project, we took an existing whiteboard and tried to make changes in that whiteboard by adding some extra functionalities such as chat collaboration, integrated browser, screen recording and sharing, text editor with advance features, etc.
- The main purpose of this project is that the teachers do not face problems while teaching or explaining. Or the teacher can explain the things in better way.
